Project no 1

RULE BASED AI CHATBOT

ARTIFICIAL INTELLIGENCE INTERSHIP

PRESENTED BY:
KUNAL KRISHNA
Intern at Decodelabs

Submitted To:
DecodeLabs AI Internship Team

Batch:
2026

OBJECTIVE

create a simple AI chatbot using Python that responds to predefined user inputs using if-elif-else statements and a continuous while loop

key points:

Language
Python

Logic
If-elif-else

Loop
while true

TOOLS USED

1. Python 3
2. Vs code/Idle/pydroid 3
3. Github

Algorithm

- 1.start the chatbot
- 2.Take input from user
- 3.check the input using if-else conditions
- 4.Display the appropriate response
- 5.Repeat until the user enters "Bye"
- 6.End the program

```
1 # Rule-Based AI Chatbot
2 # DecodeLabs Internship Project 1
3
4 print("=====")
5 print(" Welcome to AI Chatbot ")
6 print("=====")
7 print("Type 'bye' to exit.\n")
8
9 while True:
10
11     user = input("You: ").lower().strip()
12
13     if user in ["hi", "hello", "hey"]:
14         print("Bot: Hello! How can I help you?")
15
16     elif user == "how are you":
17         print("Bot: I am fine. Thanks for asking!")
18
19     elif user == "what is your name":
20         print("Bot: My name is AI Chatbot.")
21
22     elif user == "who made you":
23         print("Bot: I was created using Python.")
24
25     elif user == "what is ai":
26         print("Bot: AI stands for Artificial Intelligence")
27
28     else:
29         print("I don't understand that. Please try again.")
30
31     if user == "bye":
32         print("Goodbye!")
33         break
```

SOURCE CODE

```
28 elif user == "what is python":
29     print("Bot: Python is a popular programming
language.")
30
31 elif user == "why learn python":
32     print("Bot: Python is easy to learn and widely
used in AI and software development.")
33
34 elif user == "what is coding":
35     print("Bot: Coding means giving instructions
to a computer.")
36
37 elif user == "what is btech":
38     print("Bot: BTech stands for Bachelor of
Technology.")
39
40 elif user == "your favorite language":
41     print("Bot: Python is my favorite language.")
42
43 elif user in ["thanks", "thank you"]:
44     print("Bot: You're welcome!")
45
46 elif user == "bye":
47     print("Bot: Goodbye! Have a great day.")
48     break
49
50 else:
51     print("Bot: Sorry, I don't understand that
question.")
```

SOURCE CODE

```
Welcome to AI Chatbot
=====
Type 'bye' to exit.

You: hi
Bot: Hello! How can I help you?
You: how are you
Bot: I am fine. Thanks for asking!
You: what is your name
Bot: My name is AI Chatbot.
You: what is ai
Bot: AI stands for Artificial Intelligence.
You: what is btech
Bot: BTech stands for Bachelor of Technology.
You: thanks
Bot: You're welcome!
You: bye
Bot: Goodbye! Have a great day.

[Program finished]
```

OUTPUT RESULTS

conclusion

The chatbot was successfully built using Python. It uses a while loop to keep running, and if-elif-else conditions to reply to user inputs. This project helped understand control flow, loops, and basic AI logic.

KEY LEARNINGS

- python syntax and basics
- If-elif-else decision making
- while loop for repetition

The image features a light beige background with the text 'Thank You' centered in a dark brown, serif font. The text is arranged in two lines: 'Thank' on the top line and 'You' on the bottom line. In the corners, there are stylized illustrations of leafy branches. The top right corner has branches with orange and grey leaves. The bottom left corner has branches with orange and pink leaves. The bottom right corner has a branch with pink leaves.

Thank
You
